This action is responsive to the communication filed August 20, 2003.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by DE '843, of record.

DE '843 shows a valve system with solenoid valves and pressure sensors 8 mounted with a circuit board 37 and sealed with an o-ring 13. As to claims 4 and 12, the Examiner relies on the European search report which found this feature.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
